How to connect a network battery cabinet to an ESS power base station

Overview

What is energy storage system (ESS)?

e the DG.Energy Storage System (ESS): Systems that enable the storage of energy the charging and discharging of power. ESS in this Guide refers to systems that use battery technologies to store energy. Innovation Review Board (IRB): The DOB's Innovation Review Board (IRB) reviews new technologies, design or construction techniques.

How to connect ESS battery?

Make sure that all terminals are tightened to 2.5 Nm, use a torque wrench. Remove the cable grommet for the RJ45 cable, poke a hole, cut it open along one side and attach it around the communication cable. The ESS Battery is now connected!.

Where can I find the installation instructions for my ESS power case?

PN: PD10008, Rev: A01, Copyright Ferroamp Elektronik AB 2022. Document subject to change without prior notice. Verify that you have the latest version of this manual on our website. In this booklet you will find installation instructions for your ESS Power Case.

How should the ESS power case be positioned?

Make sure that the ESS Power Case and the ESS Battery are positioned close enough for the premade battery cables to reach. Indoor environment protected from rain and direct sunlight. Ambient temperatures must not fall below 0 °C and not exceed 45 °C. The environment must be non-condensing, relative humidity below 95%.

How do I calibrate the ESS battery?

Turn on the EnergyHub. Close the breaker on the ESS Power Case. Close the breaker on the ESS Battery and press the start button for 5 seconds until it rings. When the system is on the battery will calibrate during the first 24

hours. During this time, you should set the charge reference to 1 kW in the system configuration ().

What are the requirements for energy storage system commissioning?

y (energy code progress inspections) ACP5 or ACP7 – Asbestos Abatement Form (if there is risk of asbestos contamination) Architectural Drawings and a permit must be filed by registered design professional, expeditor, contractor, registered electrical inspection agency, etc. System Commissioning is a requirement for every energy storage
