## Overview

---

How much solar power does Brunei have?

According to the International Renewable Energy Agency (IRENA), Brunei's cumulative installed solar capacity stood at 5 MW at the end of 2024, unchanged since 2021. Brunei aims to reach 30% renewable energy in its electricity mix by 2035. This content is protected by copyright and may not be reused.

What are the major solar installations in Brunei?

Major active solar installations in Brunei include the country's first, Tenaga Suria Brunei, launched in 2010 with a capacity of 1.2 MWp, and Brunei Shell Petroleum's 3.3 MWp solar plant, launched in 2021 to supply power to its headquarters. Both plants have plans for further expansion.

Will Malaysia build Brunei's first solar plant?

A joint venture partly owned by a subsidiary of Malaysia's Solarvest will build Brunei's first utility-scale solar plant under a 25-year power purchase agreement (PPA) with the Brunei government. A 30 MW solar park is under development in Brunei. Seri Suria Power (B) Sdn. Bhd., a newly formed joint venture, will build and operate the project.

Where will a solar plant occupy a remediated landfill in Brunei?

The solar plant will occupy a 33.3-hectare remediated landfill in Kampong Belimbing, a village in the Brunei-Muara district of northern Brunei. The project already has a land lease agreement with the government.

Does Brunei have a sustainable future?

Brunei is targeting 30% renewable energy in total power generation mix by 2035, with 200 MWp of solar energy by 2025. The launch event also saw the release of Hengyi's 2023 ESG Report, which highlights their progress in environmental sustainability, social responsibility, and governance.

## How much does solarvest cost in Brunei?

Solarvest says the project will be built for an estimated BND 34 million (\$26.46 million). Brunei's electricity generation is heavily dependent on fossil fuels, with a 95% share in 2024. The government targets to lower its GHG emissions by 20% from business-as-usual (BAU) levels by 2030, as it seeks to achieve a 30% renewable energy mix.
