

**SolarTech Power Solutions**

# **India grid-connected inverter sales**

## Overview

---

On-grid solar inverters dominate the India market with more than 70% market share in 2024. Government initiatives promoting grid-connected solar systems, net metering policies, and rising utility-scale projects support this segment's growth.

On-grid solar inverters dominate the India market with more than 70% market share in 2024. Government initiatives promoting grid-connected solar systems, net metering policies, and rising utility-scale projects support this segment's growth.

This report examines the market for grid-connected solar inverters in India. CLASP provided technical assistance to the Bureau of Energy Efficiency to launch an energy efficiency policy for grid-connected solar inverters. Grid-connected solar inverters make up nearly 80% of the rapidly growing.

The residential solar inverter market in India will see good growth, as the penetration of rooftop solar, the rising cost of electricity, and the drive at the country level to transition towards cleaner energy pick up momentum. As consumers in urban and semi-urban India are switching towards solar.

India Solar Inverter market size was valued at USD 389.0 million in 2018, growing to USD 519.6 million in 2024. The market is projected to reach USD 950.3 million by 2032, registering a CAGR of 7.9% during the forecast period (2025–2032). The India solar inverter market is led by major players such.

A solar inverter is an essential device in a solar power system that converts direct current (DC) electricity, generated by solar panels, into alternating current (AC) electricity, which is used by most household appliances and the electrical grid. Solar panels produce DC power when exposed to.

India grid-forming inverters market is expected to experience growth due to rise in investment in renewable power generation plants and an inclination towards grid modernization. India grid-forming inverters market is projected to witness a CAGR of 9.87% during the forecast period FY2026- FY2033F.

The report covers Solar Inverter Manufacturers in India and the market is segmented by Inverter Type (Central Inverters, String Inverters, and Micro Inverters), Application (Residential, Commercial and Industrial (C&I), and Utility-scale). Image © Mordor Intelligence. Reuse requires attribution.
