

**SolarTech Power Solutions**

# **Indonesia Energy Storage Voltage**

## Overview

---

What is Indonesia's energy storage capacity?

Indonesia's total cumulative installed energy storage capacity has reached around 35 MWh by mid-2024, primarily from BESS installations in distributed, isolated systems supporting solar PV generation. Installed energy storage capacity could exceed 30 GWh by 2030, based on announced projects.

How should energy storage systems be planned in Indonesia?

Planning for energy storage systems should be well integrated with power transmission, distribution, and generation planning in Indonesia, aligning with the increasing installation of VRE. Besides setting capacity targets, planning documents should outline the full range of potential ESS roles.

Will Indonesia build a battery energy storage system by 2022?

The agreement was made with other state-owned bodies, such as the Indonesian Battery Corporation, to build the Battery Energy Storage System by 2022. However, no information has yet been revealed about the Battery Energy Storage System's location or specific functions.

How does Indonesia's electricity system work?

Indonesia's electricity system can be powered predominantly by solar PV, complemented by geothermal and hydroelectric power. Off-river pumped hydro energy storage is identified as a major asset for balancing high solar energy penetration.

How big is Indonesia's electricity capacity?

In the past ten years, Indonesia has experienced a substantial expansion in its electricity capacity, which has grown from 45.2 GW in 2012 to 79.8 GW by 2022 (Ministry of Energy and Mineral Resources Indonesia, 2023), as shown in Fig. 1. Including off-grid sources, the total capacity reaches 83 GW.

Is Indonesia ready to absorb more renewables?

As the Oliver Wyman study notes, neither Indonesia's grid nor its storage infrastructure is currently ready to absorb significantly more renewables. Long-Duration Energy Storage (LDES) is crucial for balancing supply and demand over days and seasons, enabling a reliable supply of Indonesia renewable energy.
