

Iran installs solar power generation system

Overview

Iran is taking a significant step forward in renewable energy with an ambitious plan to develop 15GW of new solar capacity by 2030. This initiative which is centered around solar photovoltaic (PV) power stations marks a major shift in the country's energy strategy.

Iran is taking a significant step forward in renewable energy with an ambitious plan to develop 15GW of new solar capacity by 2030. This initiative which is centered around solar photovoltaic (PV) power stations marks a major shift in the country's energy strategy.

TEHRAN - Iran installed approximately 600 megawatts (MW) of solar power capacity in the past Iranian year (ending March 2025), marking a fourfold increase over the previous annual average of 150 MW, according to Alireza Parandeh Motlaq, deputy head of the Renewable Energy and Energy Efficiency.

The recent opening of Iran's largest solar power plant, Aftab Sharq, in central Isfahan province, marks a significant milestone in the country's pursuit of self-sufficient renewable energy technology. President Masoud Pezeshkian officially inaugurated the 120 MW Aftab Sharq facility in the presence.

Iran is taking a significant step forward in renewable energy with an ambitious plan to develop 15GW of new solar capacity by 2030. This initiative which is centered around solar photovoltaic (PV) power stations marks a major shift in the country's energy strategy. Iran's Vice-President Mohammad.

Iran has set a new record in solar power generation, with output from its solar plants reaching 800 megawatts on August 26, according to the Renewable Energy and Energy Efficiency Organization (SATBA). SATBA chief Mohsen Tarztalab, who also serves as Deputy Energy Minister, announced that 150.

Iran has set a new national record in solar energy generation, achieving an unprecedented 800 MW of instantaneous output from solar power plants across 24 sites in several provinces, according to energy authorities. This is reported by Mehr News Agency, a partner of TV BRICS. Experts reported that.

Iran plans to increase its solar power capacity to 4,700 megawatts by summer 2025. / Tehran Times Iran's Supreme Council for Economic Coordination (SCEC) has approved the allocation of \$1.5 billion for the installation of solar panels in response to the country's ongoing energy crisis. The SCEC.
