

SolarTech Power Solutions

Italian professional lithium battery bms system

**FLEXIBLE SETTING OF
MULTIPLE WORKING MODES**

Overview

What is a lithium battery management system (BMS)?

Many people are familiar with a Battery Management System (BMS), which should be installed with every lithium battery. A BMS monitors the voltages of the individual lithium cells inside a battery and has the ability to shut everything down in an emergency. A BBMS, on the other hand regulates the charging of the lithium batteries.

Why does a lithium battery need a BMS?

Lithium batteries, such as those in the Giter brand, are different in that they require a Battery Management System (BMS) for several reasons. The BMS is critical for the protection and maintenance of their cells and for the safe charge and discharge of energy.

Does a lithium-ion battery management system cut it?

Lithium-ion applications come with pretty unique electrical demands. That's why a one-size-fits-all battery management system simply won't cut it. Voltaplex offers tailored BMS design services that align with your product's power requirements, space constraints, and industry-specific compliance needs.

What is inside a voltaplex BMS battery management system?

Inside every Voltaplex BMS battery management system is a purpose-built core. This core contains microcontrollers, precision voltage sensors, temperature monitors, balancing circuits, and communication protocols tailored to you and your industry's needs.

Should you use a battery management system?

When you need a BMS design that you can count on – no matter how demanding the application – Voltaplex's battery management system ought to be your go-to choice. Lithium-ion applications come with pretty unique

electrical demands. That's why a one-size-fits-all battery management system simply won't cut it.

What is voltaplex BMS?

Industrial Energy Storage: Voltaplex's BMS maintains safety and longevity in backup systems and off-grid power units by monitoring high-capacity lithium-ion battery management systems with scalable, remote diagnostics.

Aerospace and Defense: Our BMS design provides rugged, high-reliability power for drones, avionics, and tactical gear.
