Ivory Coast buildings should be equipped with solar energy systems

Overview

Ivory Coast officially opened a 37.5 megawatt (MW) solar power plant on Wednesday in what the government said was the first step of a plan to integrate more renewable energy into the power.

Ivory Coast officially opened a 37.5 megawatt (MW) solar power plant on Wednesday in what the government said was the first step of a plan to integrate more renewable energy into the power.

The Ivory Coast is set to begin construction of the \$63.5 million Ferke Solar power plant in Sokoro, which will have an installed capacity of 52 MW. Announced by government spokesperson Amadou Coulibaly in April, the project will commence in the second quarter of 2024 and is expected to be.

The Ivory Coast's Ministry of Mines, Oil, and Energy has unveiled plans to build 12 solar plants with a total capacity of 678 MW. Boundiali (Ivory Coast) (AFP) – The sun beats down from a cloudless sky on the town of Boundiali, where Ivory Coast's first solar power plant embodies the drive to embrace clean energy without abandoning fossil fuels. Unlike the wetter, cloudier south, the climate in northern Ivory Coast bordering.

The Ivory Coast plans to start building the Ferke Solar power plant in Sokoro, costing \$63.5 million and boasting a 52 MW capacity. Government spokesperson Amadou Coulibaly revealed in April that construction will kick off in the second quarter of 2024, with operations targeted for the third.

Mamadou Sangafowa Coulibaly, the Ivory Coast's Minister of Mines, Oil and Energy, has announced plans to install 678 MW of solar capacity by 2030 and 1,686 MW by 2040. Mamadou Sangafowa Coulibaly, the Ivory Coast's Minister of Mines, Oil and Energy, has announced plans to install 678 MW of solar.

The Republic of Côte d'Ivoire is planning to build 12 photovoltaic solar plants with a combined capacity of 678 MW in different parts of the country by 2030.

Likewise, the government plans to reach 1,686 MW by 2040. The Minister of Mines, Oil, and Energy of the Ivory Coast, Mamadou Sangafowa. How many solar plants will Ivory Coast have?

Why did Ivory Coast Open a 37.5 megawatt solar power plant?

Ivory Coast officially opened a 37.5 megawatt (MW) solar power plant on Wednesday in what the government said was the first step of a plan to integrate more renewable energy into the power sector.

How much power does the Ivory Coast have?

Its capacity is set to expand to 80 MW by 2025, with financing for the expansion already approved by the government. The Ivory Coast currently has installed power capacity of 2,907 MW, with seven operational hydroelectric dams serving as its primary renewable energy source alongside four existing gas and oil-fired thermal power plants.

How will the Ivory Coast improve its energy mix?

Work began on the second phase of the project at the same time, which will take the site's capacity to 80 MW. Construction will also soon begin on a 52 MW plant in the village of Sokhoro. The Ivory Coast aims to increase the share of renewables in its energy mix to 45% by 2030.

Does Ivory Coast need fossil fuels?

By 2030, Ivory Coast has pledged to increase its share of renewable energy to 45 percent, including nine percent solar, and to reduce its greenhouse gas emissions by 30 percent. Fossil fuels however still play a key role. The West African nation recently discovered two huge oil and natural gas deposits.

How many solar plants will Côte d'Ivoire build?

The Republic of Côte d'Ivoire is planning to build 12 photovoltaic solar plants with a combined capacity of 678 MW in different parts of the country by 2030. Likewise, the government plans to reach 1,686 MW by 2040.
