

## SolarTech Power Solutions

# Jamaica solar integrated machine for home use

## Overview

---

The 40KWH battery stores excess energy generated by the solar panels during the day, ensuring a continuous supply of electricity at night or during cloudy periods. The 16KVA hybrid inverter efficiently converts the stored energy into usable AC power for household appliances. Designed for off-grid use, the system ensures homeowners in Jamaica can enjoy energy independence and avoid interruptions from an unreliable grid.
