

SolarTech Power Solutions

Japanese solar power generation home configuration

Overview

Solar power in Japan has been expanding since the late 1990s. Japan is a large installer of domestic , with most of them grid connected. The country was a major manufacturer and exporter of photovoltaics (PV), with a global market share of around 50% in the early 2000s. However, by 2019, this had dropped to below 1% due to the rise of state-backed production in China.
