Large-scale energy storage in Mauritania

Overview

The World Bank Group has approved the financing for Mauritania's first large-scale battery energy storage facility, known as the DREAM Project. It is part of an infrastructure development plan that aims to boost green hydrogen, expand energy storage, and support critical reforms in.

NOUAKCHOTT, March 27, 2025 - The World Bank Group today approved the Mauritania Development of Energy Resources and Mineral Sector Support Project —known as the DREAM Project—to boost green hydrogen development, expand energy storage, and support critical reforms in the mining sector. “The.

The DREAM Project aligns with Mauritania's Mission 300 Energy Compact, which targets universal electricity access by 2030. Part of the initiative is the construction of Mauritania's first utility-scale battery energy storage system. Mauritania has taken a bold step toward becoming a regional leader.

The World Bank Group has approved the Development of Energy Resources and Mineral Sector Support Project, known as the DREAM Project, to strengthen Mauritania's energy and mining sectors. This initiative focuses on advancing green hydrogen development, expanding energy storage capacity, and.

Mauritania launches a pioneering hybrid solar-wind plant with integrated storage, ensuring reliable power and accelerating universal energy access. Mauritania has initiated a significant energy development by signing public-

private partnership agreements for a 220 MW hybrid solar-wind power plant.

On 27 March 2025, the World Bank Group approved the Development of Energy Resources and Mineral Sector support Program (DREAM) to support green hydrogen development and energy storage in Mauritania. The \$82.5 million program will finance Mauritania's first large-scale battery-based electricity.
