

SolarTech Power Solutions

Lithium battery pack charging and discharging balancing machine

**200kWh
Battery Cluster**

Overview

It can efficiently perform the charging, discharging, and balancing of battery pack modules, thereby enhancing the efficiency of battery pack maintenance. Adopting a wide voltage design, it is suitable for charging and discharging tests of battery .

It can efficiently perform the charging, discharging, and balancing of battery pack modules, thereby enhancing the efficiency of battery pack maintenance. Adopting a wide voltage design, it is suitable for charging and discharging tests of battery .

The EP401 is a battery pack module integrated charge-discharge machine designed based on the characteristics of lithium-ion batteries used in electrical vehicles. It can efficiently perform the charging, discharging, and balancing of battery pack modules, thereby enhancing the efficiency of battery.

The EP401 is a battery pack module integrated charge-discharge machine designed based on the characteristics of lithium-ion batteries used in electrical vehicles. It can efficiently perform the charging, discharging, and balancing of battery pack modules, thereby enhancing the efficiency of battery.

Maximize efficiency with our Cylindrical Lithium Ion Battery Pack Charging & Discharging Machine. Optimal performance for your battery management needs.

Maximum support for 24 channel battery equalization with a wide range of 14~215V Battery module charging and discharging, with a maximum power of 3KW The maximum current can reach 60A Supports two working modes: battery module charging and discharging, and module charging and discharging&balancing.

ELP400 has built-in various test and maintenance modes, which are suitable for the discharge, charging, cycle charging and discharging tests of various lithium batteries on the market. Adopting an intelligent operating system and supports wireless data transmission, it helps to maintain and manage.

The Lithium Battery Charge and Discharge Equalization Integrated Machine IET series is a highly efficient, portable battery maintenance solution designed for the new energy aftermarket, supporting remote access and OTA upgrades for enhanced functionality. Leave us a message and we will usually.
