

SolarTech Power Solutions

Lithium iron phosphate energy storage cabinet solar

TAX FREE

Product Model

HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions

1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity

215KWH/115KWH

Battery Cooling Method

Air Cooled/Liquid Cooled

Overview

This product is designed as the movable container, with its own energy storage system, compatible with photovoltaic and utility power, widely applicable to temporary power use, island application, emergency power supply, power preservation and backup.

This product is designed as the movable container, with its own energy storage system, compatible with photovoltaic and utility power, widely applicable to temporary power use, island application, emergency power supply, power preservation and backup.

From 60 kWh to 2 MWh, whether it's for large-scale industrial operations or small commercial settings, Lithium Valley's energy storage solutions offer a flexible and adaptable solution to meet the diverse needs of clients. This product is designed as the movable container, with its own energy.

This advanced lithium iron phosphate (LiFePO₄) battery pack offers a robust solution for various energy storage applications. The all-in-one air-cooled ESS cabinet integrates long-life battery, efficient balancing BMS, high-performance PCS, active safety system, smart distribution and HVAC into one.

HomeGrid keeps your home or business powered on when the grid fails or energy prices are out of control. Our battery systems store electricity from solar, the grid, or a generator, then automatically powers your home when you need it—at night, during outages, or throughout the day to save money on.

Introducing our 4-Slot Lithium Iron Battery Cabinet, a robust and secure storage solution for your lithium iron phosphate (LiFePO₄) batteries. This cabinet is designed to provide a safe and organized environment for up to four batteries, keeping them protected and easily accessible. High Quality.

Designed for resilience, it offers high-capacity energy storage in a weather-resistant cabinet. Ideal for outdoor installations, the robust structure withstands extreme weather conditions. Perfect for solar energy systems and backup power. Reliable, scalable, and engineered for long-term.

Lithium iron phosphate (LiFePO₄ or LFP) batteries have emerged as the cornerstone of modern solar energy storage systems, delivering unmatched safety, exceptional longevity, and superior economic efficiency that align perfectly with the demands of renewable energy integration. With the.
