

**SolarTech Power Solutions**

**Luxembourg recommends solar power generation for home use**

**51.2V 300AH**

## Overview

---

Is Luxembourg a good place to invest in solar energy?

Overall, Luxembourg actively promotes photovoltaic installations and has seen significant growth in the sector in recent years. Government support and various incentives are expected to continue to fuel the development of solar energy in the country.

Does Luxembourg have a photovoltaic system?

Photovoltaic installations in Luxembourg are diverse and include rooftop solar, ground-mounted solar plants, floating installations and solar carports. From January 1, 2023, the government reduced the value added tax (VAT) on new photovoltaic installations to 3% and increased subsidies for photovoltaic installations for own needs to 62.5%.

Does Luxembourg need a new electricity infrastructure?

Luxembourg aims to cover over a third of 2030 electricity demand with renewables, mostly through variable renewable energy (VRE) from PV and wind generation. The share of VRE generation in imported electricity is also expected to increase significantly. Taken together, these factors will require substantial investment in electricity infrastructure.

Can wind energy be used in Luxembourg?

Incorporating nuclear into Luxembourg's energy mix could address both reliability and sustainability. Additionally, countries like Denmark and Iowa have demonstrated that wind energy can achieve a significant share—more than half of their production—illustrating the potential of wind energy to diversify Luxembourg's low-carbon sources.

How will Luxembourg contribute to energy independence?

Luxembourg is already participating in cross-border renewable energy projects and is committed to expanding its role in collaborative projects such

as those related to offshore wind energy in the North Sea and hydrogen corridors, to contribute to the EU's goal of energy independence.

How did Luxembourg achieve a breakthrough in photovoltaic installations in 2021?

In 2021, Luxembourg achieved a notable first in the realm of photovoltaic installations with the introduction of floating solar panels in Differdange.
