Majuro, Marshall Islands – The sight is striking – sleek solar panels now float atop two of the six airport water reservoir ponds, quietly capturing sunlight to power Majuro homes and businesses. This isn’t your typical solar installation. It’s the RMI Government’s latest step toward reliable.

Under the National Energy Policy and to address the challenges associated with fossil fuel dependence, the Marshall Islands implemented its outer island solar project, setting a target of 100% renewable energy electrification. The project resulted in 95% solar electrification of all outer island.

The objective of the Sustainable Energy Development Project is to increase the share of renewable energy generation and enhance the reliability of electricity supply and improve energy efficiency in the Marshall Islands. The project, implemented by MEC, has a budget of \$34 million and a lifespan.

The Republic of the Marshall Islands is calling for ambitious action by all countries to reduce greenhouse gas emissions. We are leading the way by committing to net zero emissions by 2050, with significant milestones along the way. The Marshall Islands Electricity Roadmap presents costed.

l Islands (RMI), located in the central Pacific. RMI is an independent nation consisting of five islands and 29 atolls across 750,000 square miles of ocean. RMI’s residential utility rates are approximately \$0.35 per kilowatt-hour (kWh), more than twice the average U.S. residential rate of \$0.13.

The Republic of the Marshall Islands, a nation of scattered reefs and atolls in the North Pacific, is under grave threat from sea level rise associated with climate change. With its highest point standing at a mere thirty feet above sea level, the Islands' existence is in danger of submersion. This.
