Mauritius Southern Power Grid Energy Storage

GRADE A BATTERY

LiFePO₄ battery will not burn when overcharged, over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.

Overview

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, marking a significant stride towards its ambitious goal of achieving 60% renewable energy in the electricity mix by 2030. Does Mauritius need a battery energy storage system?

Mauritius aims to increase the share of renewable energy sources in its energy mix, which leads to fluctuating power injection. To reduce this fluctuation from variable renewable energy sources, the installation of Battery Energy Storage Systems (BESS) is required.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

What is Mauritius' long term energy strategy?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by 2025. This includes reducing the country's dependence on coal and heavy oil for electricity generation.

What is Mauritius aiming to reduce dependence on?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by, reducing the country's dependence on coal and heavy oil for electricity generation.

What is the role of battery systems in stabilizing the grid?

The battery systems will allow more renewable energy, which are typically of intermittent (on and off) nature such as solar and wind, to be on-boarded onto

the national grid by carrying out the crucial role of helping to stabilize the frequency and voltage of current supply to our homes, schools, hospitals and industries, to name a few.
