Mauritius s first batch of solar energy storage policies

Overview

French renewable energy producer, Qair, has signed four PPAs with the Central Electricity Board (CEB) of Mauritius for the development of solar PV energy facilities and battery storage systems with a total capacity of up to 60 MWac, contributing to the country's.

French renewable energy producer, Qair, has signed four PPAs with the Central Electricity Board (CEB) of Mauritius for the development of solar PV energy facilities and battery storage systems with a total capacity of up to 60 MWac, contributing to the country's.

Mauritius was among the first batches of countries to receive a grant from the Fund amounting to USD 28M. This project is aimed at supporting the Government to achieve its target of 35 per cent renewable energy by 2025. It will finance the installation of battery energy storage system to . The.

Mauritius is accelerating its clean energy transition by opening a tender for solar projects with a combined capacity of 80 MW, including integrated battery storage systems. This initiative represents the country's first major solar tender since 2020 and signals a renewed push towards its ambitious.

On July 14, 2025, Mr. Mahen Kundasamy, CEO of the Economic Development Board (EDB) of Mauritius, held a follow-up meeting with Mr. Olivier Gaering, Regional Director Indian Ocean of Qair Mauritius. As a leading independent power producer specialising in renewable energy, Qair has been a key player.

Paris, August 7, 2025 – Independent renewable energy company Qair announces the closing of a new loan to support the implementation of a hybrid solar photovoltaic and battery energy storage system (BESS) project in Mauritius. This project builds upon Qair's long-standing presence in the Indian.

economy is picking up speed. The CEB has installed the first grid-scale Battery Energy Storage System (BESS), the first in its kind in Mauritius, to enable high capacity storage of changes in the energy sector. In particular, it created the Mauritius Renewable Energy Agency (MARENA) in 2016 to

promote.

40MW of solar-plus-storage capacity. Through a first procurement exercise, the archipelago's authority hopes to contract electricity under a long-term power purchase agreement (PPA) from us with a combined capacity of 35 MW. The group founded by Jean-Marc Bouchet has a combined renewable energy.
