Mexico Joint Energy Storage Project

Overview

A month after India introduced an energy storage mandate for renewable energy plants and China scrapped its own, Mexico has stepped forward with an ambitious 30% capacity requirement, alongside plans to add a further 574 MW of batteries by 2028.

A month after India introduced an energy storage mandate for renewable energy plants and China scrapped its own, Mexico has stepped forward with an ambitious 30% capacity requirement, alongside plans to add a further 574 MW of batteries by 2028.

A month after India introduced an energy storage mandate for renewable energy plants and China scrapped its own, Mexico has stepped forward with an ambitious 30% capacity requirement, alongside plans to add a further 574 MW of batteries by 2028. Future wind and solar energy projects in Mexico will.

After years of stop-and-go drafts, Mexico's Energy Regulatory Commission (CRE) finally published Resolution A/113/2024 in the Diario Oficial de la Federación on March 7, 2025. The resolution issued the General Administrative Provisions (DACG) that govern how Battery Energy Storage Systems (BESS, or.

Mexico has taken a bold step in reshaping its renewable energy sector by mandating that all new wind and solar projects include battery storage equal to 30% of their capacity. This move, announced by Jorge Islas, Undersecretary for Planning and Energy Transition, aligns Mexico with global efforts.

Mexico's energy sector has unveiled a groundbreaking policy, stirring up the global energy storage market and introducing new variables to its development path. Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must be.

The Indicative Program for the Installation and Retirement of Power Plants (PIIRCE), contained in the National Electric System Development Program (PRODESEN) 2022-2036, projects that by that period some 4,505 MW of energy storage systems could be installed in the country. This reflects a.

On February 17th, 2023 (February 16th, Beijing time), the construction of the first phase of the 120 MW Peñasco Port solar power project in Mexico was completed by the Federal Electricity Commission (CFE). The project was equipped with a complete set of energy storage solutions, advanced storage.
