

## SolarTech Power Solutions

# Mongolia implements new energy storage policy

## Overview

---

Independent new energy storage stations included in the regional plan will receive compensation based on actual discharge volumes, with a 2025 standard rate of RMB 0.35/kWh and a 10-year execution period—fully covering the lifecycle of electrochemical storage systems. Will Mongolia have a battery energy storage system?

A planned battery energy storage system for Mongolia will be the largest of its type in the world and provide a blueprint for other developing countries to follow as they decarbonize their power systems. Mongolia's coal-dependent energy sector accounts for about two thirds of Mongolia's greenhouse gas emissions.

What is Mongolia's Energy Policy?

Mongolia has abundant natural and mineral resources. To efficiently meet most of its daily energy needs these resources need to be properly developed and managed. Its energy policy aims to ensure access of its citizens to modern energy services developed on the basis of its important and high potential renewable energy sources.

What is Mongolia doing to improve power supply?

Mongolia development its southern is planning Mongolia power supply needs load. Inner Mongolia is to develop several mines China-Mongolia borderline continuing Mongolia, there growth of bilateral Mongolia is 3103 growth of power. Initiative. China, Russia and Mongolia. Mongolia, it will improve the reliability of Mongolia grid.

Will Mongolia's new battery energy storage system bring back blue skies?

New ADB-backed battery energy storage system in Mongolia will put on track the decarbonization of the energy sector and help unlock renewable energy potential to bring back blue skies to Mongolia's urban areas.

Can Mongolia achieve net zero by 2050?

Transitioning away from fossil fuels in energy systems, in a just, orderly, and equitable manner is crucial. To accelerate action in this critical decade and to achieve net zero by 2050, it would require tripling the renewable energy capacity and doubling the global rate of energy efficiency by 2030. Mongolia's clean energy landscape.

How much money does Mongolia need to achieve the SDGs?

According to UNDP's report on Mongolia's spending need for achieving SDGs, Mongolia needs to spend additional 2.1% of nominal GDP on average annually until 2030 to realize the SDG7 on clean and affordable energy, which means it will require substantial investment both foreign and domestic.
