## Overview

---

How many jobs will a battery energy storage project create in Morocco?

The first phase of the project is expected to create over 2,000 jobs. In terms of energy storage projects, Morocco is actively introducing battery energy storage systems (BESS) to complement renewable energy. Several Chinese companies are involved in this.

How much solar power does Morocco have?

Morocco has an average solar potential of five kilowatt hours (kWh) per square meter per day, although this varies geographically. Total installed capacity from solar energy currently stands at 831 MW. According to the Ministry of Energy Transition, and Sustainable Development, Morocco could potentially generate 25,000 MW of wind power.

Is Morocco preparing a tender for energy storage capacity?

According to Official Account @Storage Discover, according to a report on the website of the Ministry of Commerce of China, to enhance its energy storage capacity, the electricity branch of Morocco's National Office of Electricity and Drinking Water (ONEE) has recently issued a letter of intent for a tender.

Who will participate in a new energy project in Morocco?

Chinese state-owned enterprises such as PowerChina and China Energy Engineering Corporation (CEEC), which have experience in undertaking new energy power stations and energy storage projects in Morocco, are also expected to participate in the bidding with an EPC plus long-term operation and maintenance model.

Is Morocco a net energy importer?

A net energy importer, Morocco launched the National Renewable Energy and Efficiency Plan in February 2008 to develop alternative energy to meet 15% of its domestic needs and increase the use of energy-saving methods. The plan

is expected to create more than 40,000 jobs and stimulate over €4.5bn in investment by 2020.

Will Morocco develop a gas-fired power plant in 2025?

On April 23, 2025, Morocco's Ministry of Energy Transition and Sustainable Development launched a call for expressions of interest to develop an integrated infrastructure for natural gas reception, storage, re-gasification, and transport, alongside a gas-fired power plant.
