

## SolarTech Power Solutions

# Namibia connects to electricity and solar energy

## Overview

---

Does Namibia have a solar power plant?

The government, the ECB, and NamPower have all expressed interest in grid-connected solar and wind renewable solutions, and in May 2015, Namibia inaugurated its first-ever solar power plant – a 4.5 MW plant – which represents one percent of the country's current production of energy.

What is Namibia's energy sector?

Namibia's energy sector is primarily governed by the Ministry of Mines and Energy, which collaborates with NamPower, the state-owned utility, and the Electricity Control Board (ECB). Key developments in Namibia's renewable energy landscape include: Solar power dominates Namibia's renewable energy projects.

Why does Namibia need a new electricity grid?

Namibia's electricity grid requires upgrades to accommodate the integration of intermittent renewable energy sources like solar and wind. Grid stability and storage solutions are critical to ensure reliable energy supply.

Can solar power be a viable energy solution for Namibia?

The Kalkbult project has been instrumental in demonstrating the viability of solar power as a large-scale energy solution for Namibia. It has also created local employment opportunities and contributed to the development of the local economy. 3. The 100 MW Solar Power Plant at the Hardap Irrigation Scheme.

Is Namibia a good place for wind power?

While solar energy has received the most attention in Namibia's renewable energy strategy, wind power is also an increasingly important component of the country's energy mix. Namibia's coastline, which stretches over 1,500 kilometers, experiences strong and consistent winds, making it an ideal

location for wind power generation. 1.

What are Namibia's solar and wind energy projects?

Many of Namibia's solar and wind energy projects are located in rural areas, where they provide much-needed infrastructure, job opportunities, and income for local communities. These projects also support the development of local businesses and contribute to the overall economic growth of rural regions.
