Ontario's energy and mines minister Stephen Lecce announced the planned construction of a new lithium mine in northwestern Ontario at a news conference Wednesday. (Evan Mitsui/CBC) Plans are underway for a full service lithium mining and processing operation in northwestern Ontario, the province's.

Canada has secured a strong foothold in the global lithium supply chain, with two projects — Galaxy and North American Lithium (NAL) — ranking among the top 15 lithium producers worldwide at the end of 2024. The Galaxy project, located in northern Quebec and owned by Rio Tinto Group, ranked eighth.

By 2024, Canadian lithium battery manufacturers are not only enhancing their production capabilities but also contributing to the global push towards renewable energy and electric mobility. This article delves into the key supply

chain centers across Canada, profiles the top six lithium battery.

The Shaakichiuwaanaan Lithium Project stands as one of North America's most promising hard rock lithium developments, strategically located in Quebec, Canada. This Tier-1 asset represents a critical component in Canada's emerging battery materials supply chain, positioned to service both North.
