

SolarTech Power Solutions

New Zealand energy storage battery manufacturer wholesale

Overview

Where to buy a lithium battery in New Zealand?

Cell-Supply NZ started in 2022 and is based in Tauranga. It's one of New Zealand's top lithium battery shops. With the goal of "bringing cells to those who need them," they offer lithium-ion cells like 18350, 18650, and 21700. These cells have high energy density, low self-discharge, and a wide operating temperature range.

What kind of batteries are used in New Zealand?

Century lead-acid batteries are specially designed for New Zealand conditions. They come in two types: flooded and AGM, making them suitable for 4WDs, RVs, golf carts, wheelchairs, mobility scooters, and marine systems. Century lithium deep cycle batteries use LiFePO₄ (lithium iron phosphate) technology.

What is a battery energy storage system?

A battery energy storage system (BESS) is a technology that allows for the storage of electrical energy in batteries, which can then be used to power electrical loads. BESS can be used for a variety of applications, including grid stabilisation, load shifting, backup power, and integration with renewable energy sources such as solar and wind power.

What are the different types of battery energy storage solutions?

Our fully integrated, plug-and-play battery energy storage solutions (also known as BESS) come in different sizes, from 30 kVA to 1MW, to suit a wide range of industrial and commercial energy storage applications. They ensure maximum system effectiveness and efficiency.
