New energy stations operating in Romania

Overview

The largest power projects due to start operations during the year are the 1 GW Mintia gas-fired power plant (expected at the end of 2025), the 430 MW Iernut gas-fired power plant, an 80 MW gas-fired CHP plant in Navodari and the 30 MW Răstolița hydropower plant.

The largest power projects due to start operations during the year are the 1 GW Mintia gas-fired power plant (expected at the end of 2025), the 430 MW Iernut gas-fired power plant, an 80 MW gas-fired CHP plant in Navodari and the 30 MW Răstolița hydropower plant.

Romania is facing a decisive year for the energy sector and it has reason to be optimistic regarding the completion of important projects, according to Minister of Energy Sebastian Burduja. The Ministry of Energy has presented the main investments planned for 2025 in the national energy sector.

The Ministry of Energy of Romania expects around 2,500 MW of new power capacity to be commissioned in the country in 2025, after 1,200 MW put into operation in 2024. The largest power projects due to start operations during the year are the 1 GW Mintia gas-fired power plant (expected at the end of).

Bucharest, July 22, 2025 – Nova Power & Gas, a Romanian energy company and part of the E-INFRA Group, announces the launch of the largest battery energy storage project in Romania. The installation, which will be built in Florești, Cluj County, will have a capacity of 200 MW / 400 MWh and is.

77 new renewable energy capacities with a total capacity of 950 MW were put into operation last year, ANRE shows. This year, a tripling of the newly installed capacity is estimated. According to reports from network operators, in 2024, 77 projects for the production of electricity from renewable.

Nova Power and Gas, part of the E-INFRA group, has unveiled significant investments in energy infrastructure, including a 150 MW gas power plant in Câmpia Turzii set to be operational by December 2026, and a planned 200 MW gas plant by 2028. The company will also develop energy storage facilities.

Romania is preparing for several significant projects in the energy sector in 2025. In the current global context, where energy security becomes increasingly critical, particularly due to situations such as the disruption of Russian gas supplies via Ukraine, Romania underscores the necessity for.
