

**SolarTech Power Solutions**

# **Niue solar panel aluminum frame manufacturer wholesale**

## Overview

---

Aluminum solar panel frame is a type of aluminum extrusion frame which you can use to fix and seal solar components. Most of the solar panels have solar panel frames which hug the solar back sheets a.

Who makes a solar panel aluminum frame?

Wellste Aluminum has manufactured and supplied solar panel aluminum frame for over 20 years. 30 engineers, 10 years of aluminum industry working experience can offer you the best solution for your solar panel and solar system project.

Does otalum offer aluminium extrusion solar panel frames?

Otalum offers various aluminum extrusion solar panel frames for sale, available in a range of finishes. If the existing products are not suitable for your needs, we can also assist you in designing your own aluminium profiles for solar panel mounting and provide you with die trails for your reference.

What are solar panel frames made of?

Most of the solar panel frames we provide are made from anodized aluminum due to the strength, durability, and resistance of the material. Anodized aluminum is a non-conductive material which causes no interruptions in the normal functioning of solar panels. It has a high level of tensile strength to resist winds, snow, and other natural elements.

Why do solar panels need aluminium frames?

The aluminium frames around the solar panel is an important but often ignored component of a solar panel. Aluminium profile solar panel frame and mounting bracket are normally used to seal and fix solar battery components.

What are aluminum solar frames?

Aluminum solar frames along with high alloy stainless steel frames are made with the highest tolerances and great forming capabilities, to produce the excellent quality aluminum solar frame that we are accustomed to produce.

This expertise is ready and at your disposal for high and low volume production quantities.

What is wellste solar panel aluminum frame?

Wellste solar panel aluminum frame usually comes in 6063 aluminum alloy number with anodized surface. The anodized surface increases the corrosion resistance in the outdoor environment. solar panel aluminum frame has light weight which makes it easier to transport and install. Installation does not require any welding.
