

SolarTech Power Solutions

Off-grid inverter 1kva

Overview

What is an off-grid solar power inverter?

An off-grid solar power inverter, also known as a stand-alone inverter or solar battery inverter, is a device used in an off-grid solar system. It operates independently of the power grid and can't feed electricity to the grid. It has no provision to tap into the grid electricity.

What is a 40kW inverter for off-grid use?

The 40kW inverter for off-grid use features high-quality pure sine wave AC output and a 3 phase 4 wire connection. It has a no battery design, a wide DC input voltage range, an LCD display, and converts DC power to AC power in solar power systems.

What is the best off-grid inverter?

An ideal Off-Grid inverter for households, FSP Off-Grid (EssenSolar & Expert series) with specific AC and built-in high efficiency MPPT Solar charger, Dual charging sources (utility+solar) up to 140A, satisfying battery charging under different weather conditions and ensuring your power continuously.

What is an on-grid inverter?

An on-grid inverter, also known as a grid-tie or grid-connected inverter, is generally used with an on-grid solar system. It automatically sends the excess electricity generated by the solar system into the utility grid via a bi-directional meter. The entire export/import process is known as net-metering.

What is FSP off-grid inverter?

FSP Off-Grid inverters designed for power and charging source priority, can be set up by LCD panel according to the power consumption demand, storing and/or consuming energy are also user-defined. Solar energy is sufficient to charge the battery and carry the loads.

What is a multifunctional inverter/charger?

This is a multifunctional inverter/charger, combining functions of inverter, solar charger and battery charger to offer uninterruptible power support with portable size.
