

SolarTech Power Solutions

One-to-five solar integrated machine full set outdoor

Overview

This product consists of a photovoltaic array composed of solar cell modules, a photovoltaic reverse control integrated machine, an energy storage lithium iron phosphate battery pack, a distribution unit, a monitoring host platform, a load, and a power grid. What is an off grid solar kit?

Experience energy independence with our off grid solar kit, delivering seamless integration of solar panels, combiners, batteries, solar controllers and inverters for reliable power generation in off grid scenarios.

What makes an off-grid solar system kit different?

Every off-grid solar system kit we build is designed and tailored to the needs of each customer. While they are operationally similar, componentry, capacities and configurations may differ from system to system to ensure customer needs are met.

What is a solar combiner box?

High-efficiency solar panels harness sunlight and convert it into clean electricity, providing the foundation for your solar system kit. The PV combiner box consolidates multiple strings of solar panels, ensuring efficient power distribution and protection against overcurrent.

What accessories are included in an off-grid solar system kit?

Various accessories such as cables, MC4 connectors, and fuses are included to facilitate the installation, maintenance, and monitoring of the solar system kit. Every off-grid solar system kit we build is designed and tailored to the needs of each customer.

How does a solar inverter work?

The solar inverter converts the direct current (DC) generated by the solar panels into alternating current (AC). The solar controller regulates the charging and discharging of batteries, optimizing the performance and

lifespan of the solar energy system.

What are the different types of solar inverters?

1. LS Off Grid Solar Inverter 48V/5KW, 1 pc
2. MPPT 48V 100A, 1 pc
2. MPPT controller, 50A 96V
1. Hybrid solar inverter 15KW, 1 pc
2. MPPT Solar controller 192V 50A, 1 pc
1. 384v 80kw three phase solar inverter, 1 pc.
2. 384v 100A Solar controller, 2 pcs.
3. 570w solar panels (15 in series, 8 in parallel).
- 4.
