

## SolarTech Power Solutions

# Paraguay s energy storage power station demand

## Overview

---

How is energy sourced in Paraguay?

Energy in Paraguay is primarily sourced from hydropower, with pivotal projects like the Itaipu Dam, one of the world's largest hydroelectric facilities. This reliance underscores the need for a robust infrastructure, including efficient transmission networks and distribution systems, to leverage the country's renewable resources fully.

How much electricity does Paraguay produce?

Paraguay generated 51.8 terawatt -hours of electricity in 2004, while consuming only 3.1 TWh. Almost all of the country's electricity production comes from a single facility, the bi-national Itaipu dam. Paraguay is one of the world's largest net exporters of electric power.

Does Paraguay face energy shortages?

Paraguay is not currently experiencing energy shortages, but it does lose an important part of \$1.57bn in yearly exports of excess energy to its giant neighbours, according to Mercedes Canese, an energy consultant and former deputy energy minister.

Does Paraguay export electricity?

The country has become a significant net exporter of electricity, exporting 53.5% of its total production in the same year, which represents a 54% increase in electricity exports over the same period. Per capita, the electricity consumption in Paraguay was 2.086 MWh in 2021, showing a substantial increase of 127% since 2000.

Does Paraguay use natural gas?

Paraguay has no proven natural gas reserves, and it neither produces nor consumes natural gas. In recent years, the country has sought to promote the consumption of natural gas as a way to decrease the use of firewood and

charcoal, which has contributed to deforestation in the country.

How many hydroelectric dams does Paraguay have?

Paraguay operates two hydroelectric dams in cooperation with its neighbors: Itaipu (Brazil) and Yacyreta (Argentina). The Itaipu dam was the largest hydroelectric facility in the world, before the completion of the Three Gorges Dam in China.
