Poland 220V outdoor power supply

Overview

What voltage is 230V in Poland?

In Poland, the voltage is 230V and the frequency is 50Hz, so make sure your electronic devices support this standard. Bring a type C or E plug adapter to use local sockets. It is advisable to check the voltage and frequency compatibility of your devices before use to avoid damage.

What voltage does Poland use?

Poland operates on a voltage of 230V and a frequency of 50Hz; ensure your devices are compatible to avoid damage. 2. Use C and E type plugs; it is advisable to carry an adapter for your devices. 3. Do not use electrical appliances in damp environments to avoid electric shock or short circuits.

Do I need a plug adapter in Poland?

Poland's standard voltage is 230V with 50Hz frequency. If your device is labeled "100-240V 50/60Hz", you only need a plug adapter. If the device only supports single voltage (like 110V or 220V devices), you'll need a voltage converter to protect your device from damage.
