Portable power stations can deliver power when you need it most, whether during power outages or just for an off-grid adventure. These handy electricity suppliers vary in size, output, and energy source, not to mention durability. That's why we've tested 22 models since 2022; some we've kept on.

Each model is required to have a rated battery capacity of at least 300 watt-hours (Wh), which allows you to run a 300-watt appliance for one hour. Each model needs a max output rating of 200 W or more, letting you charge a high-power device or a few low-power devices at once. Each model must weigh.

If you're looking for the best portable power station for home backup, this guide covers the top models built to keep your essential devices running when the grid goes down. After testing the most reliable units for emergencies, off-grid use, and daily backup needs, we narrowed down the 12 best.

The product features a high-quality LiFePO4 battery that has a lifespan of 15 years with over 3500 charge/discharge cycles. This is seven times longer than conventional batteries and at a lower cost. It also has a battery management system (BMS) and control unit (MCU) to manage battery cell voltage.

Job sites, camping, and emergencies all require different levels of power, so I recommend choosing a portable power station with a high enough peak output to handle your most power-hungry appliance, device, or tool, and then going all-in on battery capacity. Small power bricks have enough juice to.

Discover 4 top-rated large capacity power stations for emergency home backup. Compare features, capacity & reliability to keep your family safe during outages.
