Price of 8 solar panels

Overview

In 2025, an 8 kW solar panel system costs around $20,720 before incentives. But recent changes to federal policy mean you have to install your system by December 31, 2025 to claim the biggest solar incentive: the 30% federal solar tax credit.

An 8 kW solar panel system is enough to power some homes—but it'll cost you about $20,720. Why trust EnergySage?

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed.

Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs $28,241 in 2025. That price effectively drops to $19,873 after considering the full federal solar tax credit.

Solar panel costs range from $16,600 to $20,500 for the average 6.5 kW system, but prices can vary from as little as $7,700 for smaller solar systems to upward of $34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of.

Compare price and performance of the Top Brands to find the best 8 kW solar system with up to 30 year warranty. Buy the lowest cost 8 kW solar kit priced from $1.10 to $2.15 per watt with the latest, most powerful solar panels, module optimizers, or micro-inverters. For home or business, save 26%.

An 8kW solar system is a popular choice for many American homeowners seeking to significantly reduce their electricity bills and lower their carbon footprint. The cost of installing such a system varies based on several factors

including equipment quality, location, labor fees, and government.

The federal investment tax credit (ITC) has been one of the most valuable incentives for homeowners considering solar for the past two decades, currently allowing solar adopters to enjoy an income tax credit in the amount of 30% of their total installation costs. Between the end of June and early. How much does an 8 kW solar system cost?

An 8 kW solar panel system costs $20,720 in 2025 before incentives. An 8 kW solar panel system produces about 11,614 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. The federal solar tax credit ends December 31, 2025—homeowners have only until the end of this year to secure 30% savings.
