Price of solar modules in northwest Uzbekistan

Overview

Uzbekistan's government has expanded direct payments to households generating solar power, disbursing more than UZS 153 billion (\$12.8 million) under its Solar Home program to encourage wider .

Uzbekistan's government has expanded direct payments to households generating solar power, disbursing more than UZS 153 billion (\$12.8 million) under its Solar Home program to encourage wider .

More than 35,000 households in Uzbekistan received state subsidies for exporting surplus electricity from rooftop solar systems between January and September, says the State Tax Committee, as participation in the Solar Home program accelerates nationwide. Image: Daniele La Rosa Messina/Unsplash.

More than 35,000 Uzbeks have received financial support from the state for generating electricity through solar panels, according to the State Tax Committee. Between January and September 2025, 35,284 individuals were granted a total of UZS 153.6bn (\$12.8mn) in subsidies from the state budget for.

Uzbekistan has great potential for solar energy due to its high levels of solar radiation and large areas of barren land that can be used for solar power plants. The country receives an average of around 300 sunny days per year, making it an ideal location for solar power generation. Graphs are.

Uzbekistan's renewable energy sector is booming, with polycrystalline photovoltaic (PV) panels becoming a cornerstone for solar projects. Whether you're a developer, investor, or homeowner, understanding price trends is critical. This article breaks down the factors shaping polycrystalline.

3.85 million solar panels – that's how many were imported into Uzbekistan in 10 months of 2023. This staggering figure represents a 21-fold increase compared to the previous year, underscoring the rapid and ambitious growth of solar energy in the country. Uzbekistan is making significant strides in.

Uzbekistan's solar sector is experiencing unprecedented growth, driven by

government initiatives targeting 12 GW of renewable capacity by 2030. With abundant solar irradiance levels of 5.5-6.0 kWh/m² daily and the 2025 "Year of Environmental Protection and Green Economy" initiative, the country has.
