Rwanda's smart solar panel equipment is affordable

Overview

Rwanda citizens now have the most Affordable Solar Home Systems in Africa, 30% more affordable than in Kenya following the East African nation's investment in a mega solar project according to the New Times. Is there a market for solar energy in Rwanda?

Only few companies in Rwanda are active in the field of solar energy. They focus mainly on the market for larger systems for public institutions, e.g. hospitals, schools etc through public tenders. In addition they and others are also trying to sell solar home systems but the market for solar lanterns and small home systems is still in its infancy.

Is Rwanda a significant source of solar energy?

Rwanda has a moderate source of solar energy, with an average solar radiation of 4 – 6 kWh per square meter per day. It has had a useful experience with the 250 kW Kigali solar project and solar water heaters. However, Rwanda's energy mix is currently dominated by biomass, which accounts for about 85% of primary energy use.

How much does a solar home system cost in Rwanda?

Energy Private Developers (EPD) has currently registered over 40 solar companies who have invested in Solar Home System (SHS) business. SHS kits Capacities available on Rwandan market are those of 12W, 20W, 40W, 50 W, 100W, 120W, 200W and 300W with average price per a kit of 67,678 Rwf.

Can solar power power a healthcare facility in Rwanda?

Solar power can indeed be used to power healthcare facilities in Rwanda. Modular solar energy systems have been installed through a Power Africa grant to provide power and clean drinking water to six off-grid healthcare facilities in Rwanda, including Gasagara healthcare center.

What is solar power & how does it impact Rwanda?

Through the provision of solar panels and the empowerment of communities, the project actively bridges the energy gap and fosters sustainable development in Rwanda. The transition from candles to solar power not only illuminates homes but also ignites a spark of hope for a brighter and cleaner future.

How much electricity does Rwanda have in 2021?

By May 2021, Rwanda's generation capacity installed is currently 238.052MW. 1,752,345 households have been connected to electricity where 1,278,601 households are on grid and 473,744 households connected to Off-grid mainly solar. Solar energy is a promising solution to meet the demand for rural households' electricity services in remote locations.
