

SolarTech Power Solutions

Sierra Leone 48v industrial frequency inverter

Overview

What is a Sierra 10 - 48/230 power converter?

Our new Power Conversion System is now available. Compact, flexible, and ready for your energy challenges. Sierra 10 - 48/230 by CE+T Power is a fully bidirectional converter (48 VDC / 230 VAC) with ultra-compact design and multiple integration possibilities.

How much power does a power conversion module produce?

The total output power per module is 1.2 kW, limited to 1 kW for each AC or DC port. Incredibly compact. We offer two levels of integration: Power Conversion Systems (PCS), fully assembled, tested and ready to deploy, and Power Conversion Kits (PCK), ideal for integrators who want to build their own solution.

What's in a Sierra 10 - 48/230?

What's in it for you?

Sierra 10 - 48/230 can be used as a UPS to secure AC & DC loads and charge the batteries. The 3 all bidirectional ports allow for multiple innovative applications such as grid reinjection, peak shavings, phase balancing or energy sharing through DC distribution, among many others.
