

**SolarTech Power Solutions**

# **Slovenia electrical energy storage equipment**

## Overview

---

Where do Slovenian electricity suppliers trade?

Slovenian electricity suppliers trade on foreign electricity markets, including the European Energy Exchange and the BSP SouthPool Regional Energy Exchange. For instance, GEN-I bought and sold over 3.3GWh in Germany and Austria, 2.5GWh in Bulgaria and Romania, 1.1GWh in Hungary, and 2.5GWh in other Southeast European markets in 2010.

Where does Slovenia's electricity come from?

Roughly one-third of Slovenia's electricity comes from hydroelectric sources, one-third from thermal sources, and one-third from nuclear power (with non-hydro renewables constituting two percent of the total). Almost half of Slovenia's total energy consumption consists of imported petroleum purchased on global markets.

Will Tesla megapacks support 70 percent of Slovenia's energy grid?

A Tesla-powered Slovenian energy company has just launched its third-and largest-Megapack project to date, helping support 70 percent of the country's energy grid. Slovenia's NGEN first started utilizing Tesla Megapacks for energy storage and grid stabilization in 2019.

Where is Ngen deploying the largest battery storage units?

Developer NGEN is deploying the largest battery storage units in Slovenia, Austria and Croatia, and wants to take its model beyond CEE too.
