Solar Energy Company

Headquarters

Overview

UGE International is a worldwide distributed solar energy company, founded in 2008, with headquarters in New York City and Toronto, and a local office in the Philippines. As of 2021, the company has installed 500MW of solar energy worldwide and completed more than 700 projects. In 2024, UGE was acquired.

Who owns Uge solar?

In 2024, UGE was acquired by investment firm NOVA Infrastructure. The company develops, owns, and operates community and commercial solar & energy storage projects. Building owners, landowners, and institutional and commercial entities serve as site hosts for the solar projects.

What is convergent energy storage & solar?

Powered by results. Convergent has over \$1bn invested in or committed to energy storage and solar systems across North America. Energy storage systems (with or without solar PV) allow electricity to be stored—and then discharged—at the most strategic times.

What are energy storage systems?

Energy storage systems (with or without solar PV) allow electricity to be stored—and then discharged—at the most strategic times. Today, Lithium-ion batteries, the same batteries that are used in cell phones and electric vehicles, are the most commonly used type of energy storage.

Are innovative storage technologies the future of energy?

With demand for clean, reliable and efficient energy continuing to climb, companies pioneering innovative storage technologies have a spotlight shone on them to ensure the future and success of the energy landscape.

Why is Panasonic a leading energy storage company?

Thanks to a wide and varied portfolio of solutions, Panasonic has positioned itself as one of the leaders in the energy storage vicinity. Panasonic is one of the industry's top names due to its advances in innovative battery technology

alongside strategic partnerships and extensive experience in manufacturing high-quality products.

Is Tesla Energy a good energy storage company?

Tesla Energy's energy storage business has never been better. Despite only launching its energy storage arm in 2015, as of 2023 the company had an output of 14.7GWh in battery energy storage systems. Its portfolio includes storage products like the Powerwall and the Megapack.
