Solar Energy Storage Central Tower

Overview

In 2021, the US (NREL) estimated the cost of electricity from concentrated solar with 10 hours of storage at \$0.076 per kWh in 2021, \$0.056 per kWh in 2030, and \$0.052 per kWh in 205.

- Some concentrating solar power (CSP) towers are air-cooled instead of water-cooled, to avoid using limited desert water
- Flat glass is used instead of the more expensive curved glass.
