

SolarTech Power Solutions

Solar dual-panel solar panels

Overview

Why should you choose dualsun solar panels?

Dualsun develops high-performance hybrid solar (PVT) panels that lower energy costs and enhance the energy rating of homes and buildings. For a complete solution, we also provide perfectly-matching PV panels. Dualsun PVT (Photovoltaic and thermal) solar panels, when combined with a heat pump, can cover all your building's energy needs.

What is a dual sun solar panel?

High Efficiency: DualSun panels are engineered for exceptional solar photovoltaic (electricity production) and thermal (hot water production) efficiency. This dual capability ensures optimal use of solar energy, resulting in increased overall energy production compared to standard solar panels.

What is a dualsun Pvt solar panel?

Dualsun PVT (Photovoltaic and thermal) solar panels, when combined with a heat pump, can cover all your building's energy needs. PVT panels maximize self-consumption of your solar electricity—without the need for costly batteries—by using excess power and thermal energy to produce hot water and heating. The result for you:.

Can dual-glass solar panels be used as a rooftop energy source?

With solar power evolving into a mainstream energy source, industry leaders and experts are starting to look beyond traditional solar panels. Dual-glass technology for rooftop installations can help investors, installers, and end-users recoup their investments faster than before.

What is a dual sun half cut solar panel?

DualSun Flash Half-Cut Solar Panels The DualSun Flash half-cut solar panels feature monocrystalline half-cells, delivering exceptional performance even over limited roof areas. This innovative design minimizes energy losses

caused by shadows, low light conditions, and temperature changes.

What is a dualsun spring solar hybrid Pvt panel?

The Dualsun SPRING solar hybrid PVT panel is designed to maximize energy output by generating both electricity and heat. And when SPRING panels are combined with a brine-water heat pump, this power combination provides 6x more solar energy from rooftop surfaces compared to PV. In some cases, it's even up to 15 times more energy. PVT-OPTIMIZED GSHP
