

SolarTech Power Solutions

Solar inverter market concentration

Overview

By application, utility-scale installations accounted for 63% of the solar PV inverter market size in 2024, while residential is set to grow at a 7.6% CAGR through 2030.

By application, utility-scale installations accounted for 63% of the solar PV inverter market size in 2024, while residential is set to grow at a 7.6% CAGR through 2030.

The Solar PV Inverters Market size is estimated at USD 14.27 billion in 2025, and is expected to reach USD 19.89 billion by 2030, at a CAGR of 6.87% during the forecast period (2025-2030). The market's expansion is underpinned by a move from simple DC-to-AC conversion toward smart, grid-forming.

The global PV inverter market was valued at USD 34.6 billion in 2024 and is estimated to grow at a CAGR of 9.5% from 2025 to 2034. The paradigm shift toward the integration of renewable energy resources will fuel the adoption of efficient systems. Photovoltaic inverters in the last decade have.

The global pv inverter market size was estimated at USD 13,088.5 million in 2023 and is projected to reach USD 41,869.7 million by 2030, growing at a CAGR of 18.1% from 2024 to 2030. The growing awareness regarding environmental issues and need to reduce carbon emissions is driving demand for clean.

According to a new report published by Allied Market Research, the global solar inverter market size was valued at \$7.7 billion in 2020 and is projected to reach \$17.9 billion by 2030, growing at a CAGR of 8.8% from 2021 to 2030. A solar (PV) inverter is an essential device that converts direct.

The global solar inverter market size is estimated at USD 12.94 billion in 2025 and is predicted to reach around USD 25.81 billion by 2034, accelerating at a CAGR of 7.97% from 2025 to 2034. The Asia Pacific solar inverter market size surpassed USD 5.56 billion in 2025 and is expanding at a CAGR of.

The report examines the capacity and market value of the PV modules market, categorised by technology, for both historical (2020-24) and forecast (2025-2030) periods. It also analyses the capacity and value of the PV inverters market based on consumer segments and outlines the overall market value.
