First Solar (Nasdaq: FSLR), the US's largest solar panel maker, announced it will open a new 3.7-gigawatt (GW) factory in the US to finish production of its Series 6 modules started at its overseas factories. Production is expected to launch at the end of 2026 and ramp up through the first half of.

The Arizona-based solar module manufacturer commissioned its newest facility in August and plans to add 3.7 GW in annual finishing capacity by next December. First Solar's domestic supply chain positions it to benefit from international trade frictions, company officials said Oct. 30, 2025, during.

NREL conducts analysis of solar industry supply chains, including domestic content, and provides quarterly updates on important developments in the industry. These analyses draw from data collected through a combination of third-party market reports, primary interviews, and publicly available data.

Our mission is to provide cost-advantaged solar technology through innovation, customer engagement, industry leadership, and operational excellence. Our strengths and competitive advantages include: Founded in 1999, First Solar is a leading American solar technology company and global provider of.

First Solar has inaugurated its new \$1.1 billion fully vertically integrated thin-film solar manufacturing facility in Lawrence County, Alabama. This plant adds 3.5GW of solar manufacturing capacity, significantly expanding the company's domestic production capabilities. According to Mark Widmar.

Each quarter, the National Renewable Energy Laboratory conducts the

Quarterly Solar Industry Update, a presentation of technical trends within the solar industry. Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and.
