Overview

What happened to solar panels in China?

Solar companies cut costs and prices sharply to maintain market share. That led to a few low-cost survivors while many other competitors were driven out of business in China and around the world. The deserted blue-walled factory of Hunan Sunzone, left, which once made solar panels in Changsha, China.

Is China's solar panel industry in upheaval?

The country's solar panel exports, measured by how much power they can produce, jumped another 10 percent in May over last year. But China's solar panel domestic industry is in upheaval. Wholesale prices plummeted by almost half last year and have fallen another 25 percent this year.

Are solar panels a problem in China and Xinjiang?

But a new report by experts in human rights and the solar industry found that the vast majority of solar panels made globally continue to have significant exposure to China and Xinjiang. The report, released Tuesday, also faulted the solar industry for becoming less transparent about the origin of its products.

Are solar panel makers cutting prices?

Solar panel makers are cutting prices but still building factories. Gilles Sabrié for The New York Times Keith Bradsher, who has covered China's solar industry since 2009, reported from Changsha, China. Over the past 15 years, China has come to dominate the global market for solar energy.

Are solar panels a fraud or a deceptive business?

Updated on: September 19, 2024 / 5:50 PM EDT / CBS New York NEW YORK - The Legal Aid Society has filed a lawsuit accusing five solar panel companies of deceptive business practices and fraud. Lawyers say the companies work in tandem to target seniors and low-income residents with misleading advertising and miscalculations of cost.

Why are solar panels made in China?

China so dominates the supply chain for essential materials such as polysilicon that much of the U.S. solar panel manufacturing process is relegated to assembly of components manufactured in China's plants at home and abroad.
