

## SolarTech Power Solutions

# Solar power generation and Huijue energy storage

### BASIC APPLICATION

Storage systems have been proven to be "extremely lucrative" for commercial and industrial (C&I) fields.

## Overview

---

This product integrates solar power generation with a storage container, forming a mobile renewable energy station. Capacity: Power range from 18kW to 150kW, with storage capacity up to 430kWh; supports multiple sizes from 8 to 40 feet.

This product integrates solar power generation with a storage container, forming a mobile renewable energy station. Capacity: Power range from 18kW to 150kW, with storage capacity up to 430kWh; supports multiple sizes from 8 to 40 feet.

This product integrates solar power generation with a storage container, forming a mobile renewable energy station. Capacity: Power range from 18kW to 150kW, with storage capacity up to 430kWh; supports multiple sizes from 8 to 40 feet. Mobility: Foldable structure allows for rapid deployment.

That's where huijue solar energy for energy storage becomes the rockstar of renewable energy solutions. Imagine your solar panels as overachieving sunflowers soaking up rays all day, while your home battery system plays the nightshift security guard. This dynamic duo could slash your electricity.

Maximize renewable energy with our cutting-edge BESS solutions. Huijue's lithium battery-powered storage offers top performance. Suitable for grids, commercial, & industrial use, our systems integrate seamlessly & optimize renewables. High-density, long-life, & smartly managed, they boost grid.

typical application of microgrid energy storage. The core consists of Microgrid with PV, batteries, & charging piles Stores solar power, supplies to charging piles. Red ipment and intelligent energy storage equipment. Huijue N twork products are exported t typical application of microgrid energy.

Huijue Group's next-generation home energy storage inverter system perfectly integrates the solar inverter, lithium-ion energy storage battery, and energy management system. The solar inverter, as the core component, is responsible for converting the DC electricity generated by the solar panels.

Huijue Group's energy storage solutions (30 kWh to 30 MWh) cover cost management, backup power, and microgrids. To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an.
