

SolarTech Power Solutions

Solar power plant

Overview

What are the benefits of a solar power plant?

In rural areas, solar power provides a much more healthy, safe source of indoor lighting than kerosene. Additionally, solar power plants like the Bhadla Solar Park drive economic growth and job creation in surrounding areas.

How does a solar power plant work?

A solar thermal power plant is an electric generation system that collects and concentrates sunlight to produce heat that is then used to create electricity. All solar thermal power systems are made with two primary components: reflectors (or mirrors) that catch and focus sunlight and a receiver.
