## **Lithium Battery Wholesale**

## Overview

---

Why do we supply bulk lithium-ion batteries?

Our strong network of partners enables us to supply bulk lithium-ion batteries with an internal emphasis on quality control and customer support. As a dependable lithium-ion battery supplier and battery pack manufacturer, we can deliver reliable energy storage solutions for any application.

Who can supply lithium-ion batteries in-house?

If you desire to prototype or assemble battery packs in-house, we can supply cutting-edge lithium-ion cells from leading manufacturers like Panasonic, Sanyo, LG, Samsung, Sony, BAK, Lishen, and others.

What industries do you supply lithium-ion battery packs?

Our core competency is in the large-scale manufacturing of small to medium format lithium-ion battery packs. Some industries we supply include home energy storage, electric vehicles, medicine, military, computing, power tools, robotics, sensors, and more.

Who makes lithium-ion battery packs?

Both provide battery pack assembly and testing. Our battery pack manufacturing centers in Xiamen and Shenzen provide additional services and the production of lithium-ion battery packs and cells. With over 50 years of combined experience in lithium-ion battery technology, no project is too big for us to handle.

What is the difference between LSE bulk energy storage (Bes) and NYGATS?

While the proposed process for an LSE Bulk Energy Storage (BES) obligation and reconciliation is similar to those of NYSERDA Large-Scale Renewables programs, some differences exist. No Renewable Energy Certificates (RECs) will be created in NYGATS for the Bulk Energy Storage program.

## What is a 2022 energy storage plan?

The proposed plan begins with background on the 2019 Climate Leadership and Community Protection Act (“the Climate Act”) and the 2022 Energy Storage Roadmap (“the Roadmap”) as updated in March 2024. The plan then outlines the structure of the program, with a focus on the Index Storage Credit (ISC) incentive mechanism.
