South African Republic Telecommunication Energy Storage Battery

Overview

Developed by Globeleq, which is 30% owned by Norfund, in partnership with African Rainbow Energy, the 153 MW/612 MWh project was signed off in June 2025 in Cape Town. It will be located in South Africa's Northern Cape Province and occupies a five-hectare site.

Developed by Globeleq, which is 30% owned by Norfund, in partnership with African Rainbow Energy, the 153 MW/612 MWh project was signed off in June 2025 in Cape Town. It will be located in South Africa's Northern Cape Province and occupies a five-hectare site.

Ongoing capacity shortages and load shedding have plagued South Africa for most of the past ten years, caused by declining availability of its ageing coal fleet. Load shedding is the deliberate stoppage of electrical power supply by system operators as a preventive measure to maintain system.

Updated 1st July 2025 – The Red Sands Battery Energy Storage System (BESS), set to be Africa's largest of its kind, has officially reached commercial close. Developed by Globeleq, which is 30% owned by Norfund, in partnership with African Rainbow Energy, the 153 MW/612 MWh project was signed off in.

The government of South Africa has secured nearly 1.7GW/11GWh of grid-scale BESS capacity via various procurement programmes, though questions have been raised around their integrity and deliverability. BESS to reduce blackouts, integrate renewables in South Africa In an effort to increase.

Battery storage systems offer a solution by storing surplus energy generated during peak production periods, releasing it when demand's high. South Africa is searching for solutions to achieve economic growth and a sustainable future writes Tshwanelo Rakaibe, Senior Researcher: Energy Centre.

South Africa has reached a major milestone in its renewable energy transition, as three cutting-edge Battery Energy Storage System (BESS) projects, collectively known as Oasis, progress toward implementation. These projects are part of the nation's inaugural Battery Energy Storage Independent Power.

huge renewable energy potential. Through research and study dissemination, capacity building programmes and stakeholder engagement, we strive to create an enabling environment for the implementation of renewable energy projects in the region and drive the just energy transition installed energy.
