

## SolarTech Power Solutions

# South African battery BMS electronic control

## Overview

---

What is a battery management system (BMS)?

A Battery Management System (BMS) is an essential electronic system that monitors and protects lithium-ion battery packs. It tracks voltage, current, temperature, and state of charge (SOC), balances cells, and safeguards your system against overcharging, deep discharge, and overheating. This ensures optimal battery performance and longevity.

Why should you choose lithium batteries South Africa?

At Lithium Batteries South Africa (LBSA), we prioritize the safety, performance, and lifespan of our lithium energy storage solutions. Our advanced Battery Management System (BMS) ensures your LiFePO<sub>4</sub> batteries operate efficiently and safely, providing reliable energy for homes, businesses, farms, and lodges.

How does LBSA BMS work?

LBSA's BMS integrates seamlessly with our full range of lithium batteries, including low-voltage and high-voltage systems. This guarantees optimal performance, protection, and energy efficiency across all applications. Gain full control with LBSA Sentinel, our cloud-based monitoring platform.
