

SolarTech Power Solutions

Southeast Asia solar Module Project

Overview

The latest supply chain map from Sinovoltaics tracks growth across Southeast Asia, with module capacity reaching 78.8 GW, and 58 production projects tracked. What will Southeast Asia's Solar supply chain look like in 2025?

In the 1st edition of its Southeast Asia Solar Supply Chain Map for 2025, Sinovoltaics expects the nameplate solar PV module manufacturing capacity of Southeast Asia to grow from 86 GW at present to 101 GW by 2028 or 2030. For solar cells, it projects an increase from 51.3 GW to 69.8 GW by 2030.

How much solar power does Southeast Asia have?

Presently, ASEAN boasts 28 GW of large utility-scale solar and wind power, contributing 9 percent to the region's total electricity capacity. Solar photovoltaics (PV) play a pivotal role renewable energy revolution of Southeast Asia. Abundant sunlight, economic growth, and the rising demand for clean energy drive this shift.

Are floating solar PV installations a key pillar of Southeast Asia's Energy Future?

Solar photovoltaic (PV) capacity additions are poised to be a central pillar of Southeast Asia's energy future, with floating installations primed to play a critical role.

What is the role of solar photovoltaics in Southeast Asia?

Solar photovoltaics (PV) play a pivotal role renewable energy revolution of Southeast Asia. Abundant sunlight, economic growth, and the rising demand for clean energy drive this shift. Vietnam and the Philippines dominate the solar and wind capacity projections of South-east Asia, contributing 80 percent of the anticipated utility-scale projects.

Where is the largest floating solar power plant in Southeast Asia?

Country: Indonesia Capacity: 192 MWp The Cirata Floating Solar Power Plant,

Southeast Asia's largest floating solar installation, is located on a 250-hectare area of the Cirata Reservoir in West Java, Indonesia. This 145 MW (192 MWp) facility is Masdar's first floating PV project and marks its entry into the Southeast Asian renewable energy market.

Will Southeast Asia's Solar PV manufacturing capacity grow in the future?

Southeast Asia's solar PV manufacturing capacity is expected to grow in the future, according to Sinovoltaics, which adds that operational capacities have been significantly reduced or temporarily halted owing to US tariffs. (Photo Credit: Sinovoltaics)
