

## SolarTech Power Solutions

# Southern rooftop solar panels

## Overview

---

Why should you choose a rooftop solar system?

Power your home with clean energy straight from the sun. Get low-cost clean energy while reducing your carbon footprint with rooftop solar panels. When you pair solar with an energy storage system you can increase your comfort and safety during power outages and further reduce the cost of your electric bill.

Are rooftop solar panels a good investment?

Get low-cost clean energy while reducing your carbon footprint with rooftop solar panels. When you pair solar with an energy storage system you can increase your comfort and safety during power outages and further reduce the cost of your electric bill. Typically a lower installation cost than ground-mounted systems.

What is rooftop solar & how does it work?

Rooftop solar lets you power your upgraded home with renewable energy from the sun. Make the most of your upgrades when you start by preparing your home, then explore cleaner, more efficient options. Before you go solar, start with a no-cost home energy assessment.

Does SRP offer rooftop solar for homes?

SRP is committed to investing in solar energy, but it does not offer rooftop solar for individual homes. Instead, it focuses on utility-scale solar energy produced in commercial facilities like solar farms, which can be shared with customers across the Valley.

Is rooftop solar good for US energy systems?

Whether rooftop solar is good for U.S. energy systems depends on how those trade-offs are analyzed, said Severin Borenstein, the faculty director at the Haas School of Business's Energy Institute at the University of California,

Berkeley. “The question is how do we meet growing demand” for electricity, Mr. Borenstein said.

Which roofs are best for solar panels?

A south-facing roof that’s in good condition and free of buildings or trees that create shade will help to maximize how much solar your panels can capture throughout the day. Higher electric bills — especially those with high usage during peak hours — benefit the most from investing in rooftop solar.
