Sri Lanka's state-owned utility, the Ceylon Electricity Board (CEB), has issued a Request for Proposals (RFP) for the development of 160 MW/640 MWh of standalone battery energy storage systems (BESS). The Ceylon Electricity Board (CEB) has requested proposals for a standalone battery energy storage.

**ECONOMYNEXT** – Sri Lanka's state-run Ceylon Electricity Board has extended a deadline for private investors to bid for the islands first grid scale battery energy storage system (BESS) till October 14. The CEB plans to install 10MW/40MWh battery systems in 10 locations indicating storage of 640MWh.

Ceylon Electricity Board (CEB), the main electricity company in Sri Lanka, has issued an RFP for large-scale BESS. The state-owned firm issued the request for proposals (RFP) on 30 July, seeking companies to build, own and operate large scale battery energy storage system (BESS) projects in Sri.

This innovative venture is set to revolutionize the country's renewable energy sector, offering a stable and efficient solution for integrating solar and wind power into the national grid. The project underscores Sri Lanka's commitment to a greener future by reducing dependence on fossil fuels and.

The Asian Development Bank (ADB) multilateral finance institution has approved a loan to upgrade Sri Lanka's grid infrastructure. ADB said yesterday (25 November) that the US\$200 million loan will fund the Power System Strengthening and Renewable Energy Integration Project, which includes the.
