

## SolarTech Power Solutions

# Swedish emergency energy storage power supply

**51.2V 300AH**

## Overview

---

The reserve, in place until 2035, constitutes a capacity mechanism designed to ensure adequate electricity supply in scarcity events, particularly during winter months. The scheme will be open to generation, storage and demand-side response projects capable of contributing to security of supply. Does Sweden have a strategic electricity reserve?

The Commission has approved, under Article 107 (3) (c) TFEU and the CEEAG, a EUR 300 million Swedish measure establishing a strategic electricity reserve to safeguard security of supply in emergency situations.

How many energy storage facilities are there in Sweden?

The opening ceremony for one of the 14 facilities was held in Eskilstuna. The Role of Energy Storage in the Energy Transition Since 2023, Ingrid Capacity and BW ESS have been working together on 14 large-scale energy storage projects strategically located within Sweden's electricity grid in price zones SE3 and SE4.

What if there is an electricity crisis in Sweden?

ricity supply and is likely to lead to an electricity crisis. The Swedish Energy Agency shall be able to issue an early warning and announce that there is an electricity crisis in accordance with the Risk Preparedness Regulation. Svenska kraftnät shall provide the Swedish Energy Agency with all necessary information.

How many energy storage facilities will Ingrid capacity build in Sweden?

Ingrid Capacity plans to build an additional 13 energy storage facilities in Sweden by the end of 2024, with a total capacity of 196 MW/196 MWh. By the second half of 2025, the company aims to have over 400 MW/400 MWh of flexible resources in the Swedish electricity grid.

When will a battery energy storage system be built in Sweden?

Construction has begun on Sweden's largest Battery Energy Storage System

(BESS) undertaken by Neoen, an Independent Power Producer and Nidec, a system integrator. The project has been projected to come online in early 2025. Neoen is headquartered in Paris.

Why should Sweden invest in energy storage?

“Sweden faces increasing electricity demand, which must be addressed by expanding carbon-free energy production, strengthening energy grids, and improving energy storage capabilities. It is an honor to inaugurate the largest energy storage investment in the Nordic region.
