

SolarTech Power Solutions

Taipei Energy Storage System Procurement

Overview

Local engineering procurement companies (EPC) are likely to lead the overall project / connection to the grid, while foreign suppliers are expected to provide batteries and software. At present, local Taiwan electronics manufacturing companies are actively engaged in providing this service to TPC. What is Taiwan's energy storage policy?

Taiwan's power grid system is an independent power grid. To cope with the impact of renewable energy integration in the future, there is a demand for energy storage systems. The government's policies on energy storage can be summarized as follows: (1) Solving the problem of intermittent renewable energy grid connection.

What is Taiwan's energy storage industry?

According to the analysis put forward by the Industry, Science and Technology International Strategy Center (ISTI) of the ITRI, Taiwan's energy storage industry can be divided into batteries, power regulators, power management systems, and system integration (SI), as well as other sectors.

What is energy storage equipment in Taiwan?

Taiwan revised its "Renewable Energy Development Act" on May 1, 2019, and Article 3, paragraph 1, Subparagraph 14 of the Act clearly defines energy storage equipment as a means of storage for power which also stabilizes the power system, including the energy storage components, the power conversion, and power management system.

What are the future prospects for Taiwan's energy storage industry?

Future prospects Taiwan's energy storage industry is currently in its infancy and is mainly being developed and dominated by the Taiwan Power Company (Taipower), the Chinese Petroleum Corporation, Taiwan (CPC Taiwan). Taipower expects to complete a 590 MW energy storage system installation by 2025.

Why are stable energy storage solutions important in Taiwan?

As Taiwan's renewable energy share continues to grow, stable energy storage solutions are becoming increasingly vital to offset fluctuations in solar and wind power generation.

Does Taiwan have a demand for energy storage systems?

Taiwan has a demand for energy storage systems, electric vehicles, and industrial development. Taiwan's foundation in the energy storage industry is in the field of battery technology, but it is difficult to compete with international manufacturers in terms of costs.
